293

54/74293 54LS/74LS293 MODULO-16 BINARY COUNTER

DESCRIPTION — The '293 is a 4-stage ripple counter containing a high speed flip-flop acting as a divide-by-two and three flip-flops acting as a divide-by-eight. HIGH signals on the Master Reset (MR) inputs override the clocks and force all outputs to the LOW state. The '293 is the same circuit as the '93 except that it has corner power pins and is therefore recommended for new designs. For detail specifications, truth tables and functional description, please refer to the '93 data sheet.
