

# DIFFERENTIAL/ CASCODE AMPLIFIER

# CA3028A

General-purpose amplifier used in differential or cascode if amplifier, converter for FM broadcast band, limiter, mixer, oscillator, and audio, sense, and dc amplifier applications. 8-lead "TO-5" package; Outline No. 4. For schematic diagram and characteristics curves, see Figs. 138, 152, 153, 162, and 168.

## MAXIMUM RATINGS

|                                           |                 |            |                  |
|-------------------------------------------|-----------------|------------|------------------|
| Positive DC Supply Voltage .....          | V <sub>CC</sub> | +18        | V                |
| Negative DC Supply Voltage .....          | V <sub>EE</sub> | -6         | V                |
| Input Signal Voltage (Single-ended) ..... |                 | 6          | V <sub>p-p</sub> |
| Total Device Dissipation .....            |                 | 300        | mW               |
| Temperature Range:                        |                 |            |                  |
| Operating .....                           |                 | -55 to 125 | °C               |
| Storage .....                             |                 | -65 to 200 | °C               |

## TYPICAL CHARACTERISTICS (At ambient temperature = 25°C)

|                                                                       |                                  | Differential<br>Amplifier | Cascode<br>Amplifier |      |
|-----------------------------------------------------------------------|----------------------------------|---------------------------|----------------------|------|
| Quiescent Operating Current:                                          |                                  |                           |                      |      |
| V <sub>CC</sub> = +9V .....                                           | I <sub>Q</sub> or I <sub>S</sub> | 2.5                       | —                    | mA   |
| V <sub>CC</sub> = +12V .....                                          | I <sub>Q</sub> or I <sub>S</sub> | 3.4                       | —                    | mA   |
