

DM54L95

DM54L95 4-Bit Parallel Access Shift Registers

Literature Number: SNOS272A

DM54L95 4-Bit Parallel Access Shift Registers

General Description

These 4-bit registers feature parallel and serial inputs, parallel output, mode control, and two clock inputs. The registers have three modes of operation.

- Parallel (broadside) load
- Shift right (the direction Q_A toward Q_D)
- Shift left (the direction Q_D toward Q_A)

Parallel loading is accomplished by applying the four bits of data and taking the mode control input high. The data is loaded into the associated flip-flops and appears at the outputs after the high-to-low transition of the clock-2 input. During loading, the entry of serial data is inhibited.

Shift right is accomplished on the high-to-low transition of clock 1 when the mode control is low; shift left is accomplished on the high-to-low transition of clock 2 when the

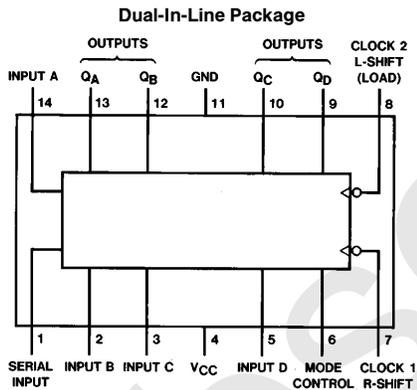

mode control is high by connecting the output of each flip-flop to the parallel input of the previous flip-flop (Q_D to input C, etc.) and serial data is entered at input D. The clock input may be applied simultaneously to clock 1 and clock 2 if both modes can be clocked from the same source.

Changes at the mode control input should normally be made while both clock inputs are low; however, conditions described in the last three lines of the truth table will also ensure that register contents are protected.

Features

- Typical maximum clock frequency 14 MHz
- Typical power dissipation mW

Function Table

Mode Control	Inputs		Outputs								
	Clocks		Serial	Parallel							
	2 (L)	1 (R)		A	B	C	D				
H	H	X	X	X	X	X	X	Q_{AO}	Q_{BO}	Q_{CO}	Q_{DO}
H	↓	X	X	a	b	c	d	a	b	c	d
H	↓	X	X	Q_B^\dagger	Q_C^\dagger	Q_D^\dagger	d	Q_{Bn}	Q_{Cn}	Q_{Dn}	d
L	L	H	X	X	X	X	X	Q_{AO}	Q_{BO}	Q_{CO}	Q_{DO}
L	X	↓	H	X	X	X	X	H	Q_{An}	Q_{Bn}	Q_{Cn}
L	X	↓	L	X	X	X	X	L	Q_{An}	Q_{Bn}	Q_{Cn}
↑	L	L	X	X	X	X	X	Q_{AO}	Q_{Bn}	Q_{CO}	Q_{DO}
↓	L	L	X	X	X	X	X	Q_{AO}	Q_{BO}	Q_{CO}	Q_{DO}
↓	L	H	X	X	X	X	X	Q_{AO}	Q_{BO}	Q_{CO}	Q_{DO}
↑	H	L	X	X	X	X	X	Q_{AO}	Q_{BO}	Q_{CO}	Q_{DO}
↑	H	H	X	X	X	X	X	Q_{AO}	Q_{BO}	Q_{CO}	Q_{DO}

† Shifting left requires external connection of Q_B to A, Q_C to B, Q_D to C. Serial data is entered at input D.
H = High Level (Steady State), L = Low Level (Steady State), X = Don't Care (Any input, including transitions).
↓ = Transition from high to low level. ↑ = Transition from low to high level.
a, b, c, d, = The level of steady state input at inputs A, B, C, or D, respectively.
 Q_{AO} , Q_{BO} , Q_{CO} , Q_{DO} = The level of Q_A , Q_B , Q_C , or Q_D , respectively, before the indicated steady state input conditions were established.
 Q_{An} , Q_{Bn} , Q_{Cn} , Q_{Dn} = The level of Q_A , Q_B , Q_C , or Q_D , respectively, before the most recent ↓ transition of the clock.

Absolute Maximum Ratings (Note)

If Military/Aerospace specified devices are required, please contact the National Semiconductor Sales Office/Distributors for availability and specifications.

Supply Voltage	8V
Input Voltage	5.5V
Operating Free Air Temperature Range	
DM54L	–55°C to +125°C
Storage Temperature Range	–65°C to +150°C

Note: The “Absolute Maximum Ratings” are those values beyond which the safety of the device cannot be guaranteed. The device should not be operated at these limits. The parametric values defined in the “Electrical Characteristics” table are not guaranteed at the absolute maximum ratings. The “Recommended Operating Conditions” table will define the conditions for actual device operation.

Recommended Operating Conditions

Symbol	Parameter	DM54L95			Units
		Min	Nom	Max	
V _{CC}	Supply Voltage	4.5	5	5.5	V
V _{IH}	High Level Input Voltage	2			V
V _{IL}	Low Level Input Voltage			0.7	V
I _{OH}	High Level Output Current			–0.2	mA
I _{OL}	Low Level Output Current			2	mA
f _{CLK}	Clock Frequency (Note 1)	0		6	MHz
t _{W(CLK)}	Pulse Width of Clock (Note 1)	90			ns
t _{SU}	Data Setup Time (Note 1)	50			ns
t _{EN}	Time to Enable Clock (Note 1)	Clock 1	120		ns
		Clock 2	100		ns
t _H	Data Hold Time (Note 1)	0			ns
t _{IN}	Time to Inhibit Clock 1 or Clock 2 (Note 1)	0			ns
T _A	Free Air Operating Temperature	–55		125	°C

Note 1: T_A = 25°C and V_{CC} = 5V.

Electrical Characteristics over recommended operating free air temperature (unless otherwise noted)

Symbol	Parameter	Conditions	Min	Typ (Note 1)	Max	Units
V _{OH}	High Level Output Voltage	V _{CC} = Min, I _{OH} = Max V _{IL} = Max, V _{IH} = Min	2.4	3.1		V
V _{OL}	Low Level Output Voltage	V _{CC} = Min, I _{OL} = Max V _{IL} = Max, V _{IH} = Min		0.13	0.3	V
I _I	Input Current @ Max Input Voltage	V _{CC} = Max V _I = 5.5V	Mode		0.2	mA
			Others		0.1	
I _{IH}	High Level Input Current	V _{CC} = Max V _I = 2.4V	Mode		20	μA
			Others		10	
I _{IL}	Low Level Input Current	V _{CC} = Max V _I = 0.3V	Mode		–0.36	mA
			Others		–0.18	
I _{OS}	Short Circuit Output Current	V _{CC} = Max (Note 2)	–3		–15	mA
I _{CC}	Supply Current	V _{CC} = Max (Note 3)		4.8	8	mA

Note 1: All typicals are at V_{CC} = 5V, T_A 25°C

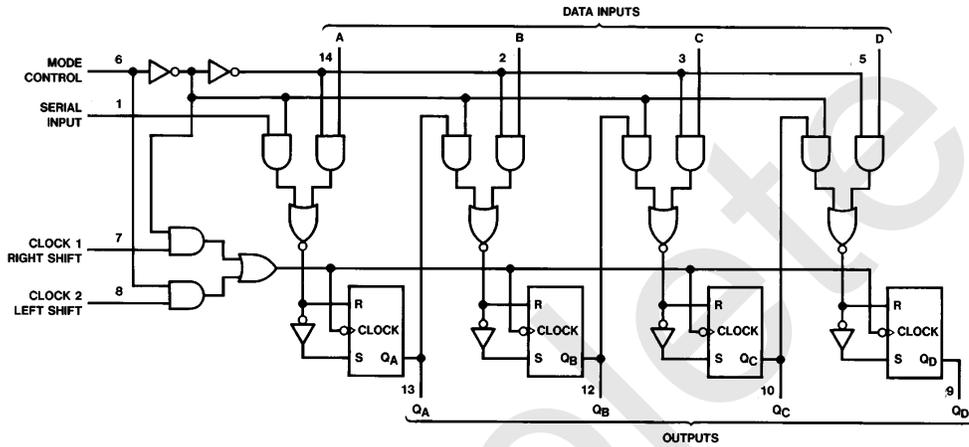

Note 2: Not more than one output should be shorted at a time.

Note 3: I_{CC} is measured with all outputs and serial input open; A, B, C, and D inputs grounded; mode control at 4.5V; and a momentary 3V, then ground, applied to both clock inputs.

Switching Characteristics at $V_{CC} = 5V$ and $T_A 25^\circ C$ (See Section 1 for Test Waveforms and Output Load)

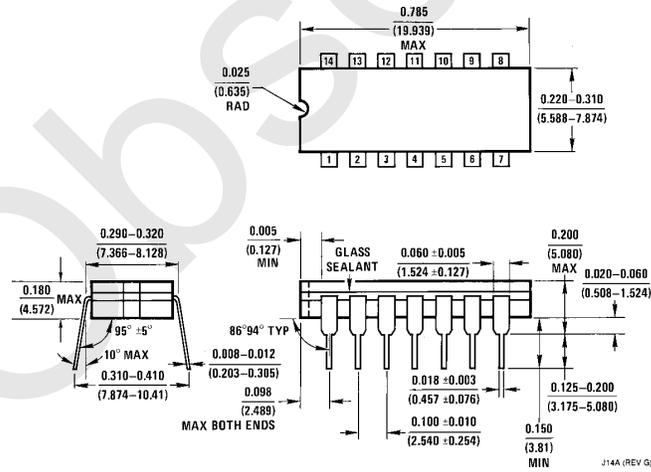

Symbol	Parameter	From (Input) To (Output)	$R_L = 4\Omega, C_L = 50\text{ pF}$		Units
			Min	Max	
f_{MAX}	Maximum Clock Frequency		6		MHz
t_{PLH}	Propagation Delay Time Low to High Level Output	Clock to Output		90	ns
t_{PHL}	Propagation Delay Time High to Low Level Output	Clock to Output		90	ns

LIFE SUPPORT POLICY

NATIONAL'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF NATIONAL SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and whose failure to perform, when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

National does not assume any responsibility for use of any circuitry described, no circuit patent licenses are implied and National reserves the right at any time without notice to change said circuitry and specifications.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
