## AGC and Quadrature IF Demodulator

#### Features

## DescriptionIF Operation10MHz to 250MHz

- I/Q Amplitude and Phase Balance 0.5dB, 2 Degrees
Voltage Gain>60dB
• AGC Range90dB
• Output P1dB With 20pF Load 2.5V <sub>PP</sub>
• Low LO Drive Level10dBm
Power Enable/Disable Control
• Single Supply Battery Operation 2.7 to 3.3V

## **Applications**

- IS-95A CDMA/AMPS Dual Mode Handsets
- Wideband CDMA Handsets
- Full Duplex Transceivers
- CDMA/TDMA Packet Protocol Radios

## Description

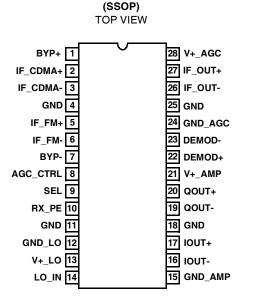

The HFA3765 is a monolithic quadrature demodulator and a gain control amplifier stage with 90dB of dynamic

range for CDMA/AMPS cellular applications. Two amplifier inputs are provided for interfacing different IF input filters. A local oscillator input requires low drive levels and a divide by two phase shifter with duty cycle compensation achieves excellent phase and amplitude balance properties. The HFA3765 is one of the four chips in the PRISM™ chip set and is housed in a 28 lead SSOP package ideally suited to cellular handset applications.

## Ordering Information

PART NUMBER	TEMP. RANGE (°C)	PACKAGE	PKG. NO.
HFA3765IA	-40 to 85	28 Ld SSOP	M28.15
HFA3765IA96	-40 to 85	Tape and Reel	

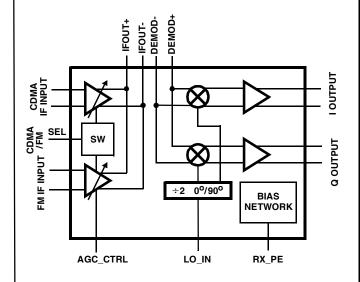

#### **Pinout**

HFA3765

PRISM™ and the PRISM™ logo are trademarks of Intersil Corporation.

## Simplified Block Diagram

# Pin Descriptions

PIN NUMBER	NAME	DESCRIPTION					
1	BYP+	DC feedback pin for the AGC amplifier. Requires good RF decoupling to a solid ground.					
2	IF_CDMA+	Non-inverting analog input of the AGC amplifier, CDMA channel.Requires a DC blocking capacitor. A parallel differential DC coupled resistor setting the input impedance with its complementary input is possible.					
3	IF_CDMA-	Inverting analog input of the AGC amplifier, CDMA channel. Requires a DC blocking capacitor. A parallel differential DC coupled resistor setting the input impedance with its complementary input is possible. AC couple to ground if the port is to be used single ended.					
4	GND	Ground. Connect to a solid ground plane.					
5	IF_FM+	Non-inverting analog input of the AGC amplifier, FM channel. Requires a DC blocking capacitor. A parallel differential DC coupled resistor setting the input impedance with its complementary input is possible.					
6	IF_FM-	Inverting analog input of the AGC amplifier, FM channel. Requires a DC blocking capacitor. A parallel differential DC coupled resistor setting the input impedance with its complementary input is possible. AC couple to ground if the port is to be used single ended.					
7	BYP -	DC feedback pin for the AGC amplifier. Require good RF decoupling to a solid ground.					
8	AGC_CTRL	AGC current control input. Requires a 15K 1% series resistor.					
9	SEL	Selects the CDMA or FM AGC Amplifier differential input. HIGH selects the CDMA input; LOW selects the FM input.					
10	RX_PE	Power enable control input. HIGH for normal operation. LOW for power down.					
11	GND	Ground. Connect to a solid ground plane.					
12	GND_LO	LO_IN input ground return. Ground to Local Oscillator ground plane or transmission line.					
13	V+_LO	LO divider network Power Supply. Use high quality RF decoupling capacitors at the pin.					
14	LO_IN	Current input from the Local Oscillator. Use a $50\Omega$ power to current converter. See applications diagram. Requires a DC blocking capacitor.					
15	GND_AMP	IF output amplifiers ground return.					
16	IOUT-	Negative I channel baseband output. Requires a DC blocking capacitor.					
17	IOUT+	Positive I channel baseband output. Requires a DC blocking capacitor.					
18	GND	Ground. Connect to a solid ground plane.					
19	QOUT-	Negative Q channel baseband output. Requires a DC blocking capacitor.					
20	QOUT+	Positive Q channel baseband output. Requires a DC blocking capacitor.					
21	V+_AMP	IF output amplifier Power Supply. Use high quality RF decoupling capacitors at the pin.					
22	DEMOD+	Positive input of the quadrature demodulator. Requires a DC blocking capacitor.					
23	DEMOD -	Negative input of the quadrature demodulator. Requires a DC blocking capacitor.					
24	GND_AGC	AGC amplifier main ground return.					
25	GND	Ground. Connect to a solid ground plane.					
26	IF_OUT-	Negative output from the AGC amplifier. Requires a DC blocking capacitor.					
27	IF_OUT+	Positive output from the AGC amplifier. Requires a DC blocking capacitor.					
28	V+_AGC	AGC amplifier Power Supply. Use high quality RF decoupling capacitors at the pin.					

#### 

CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

#### NOTE:

1.  $\theta_{\mbox{\scriptsize JA}}$  is measured with the component mounted on an evaluation PC board in free air.

## NOTES:

- 2. A = Production Tested, B = Based on Characterization, C = By Design
- 3. A positive frequency offset from the carrier produces the I channel leading the Q channel by 90 degrees.

## Shrink Small Outline Plastic Packages (SSOP)

#### NOTES:

- Symbols are defined in the "MO Series Symbol List" in Section 2.2 of Publication Number 95.
- 2. Dimensioning and tolerancing per ANSI Y14.5M-1982.
- Dimension "D" does not include mold flash, protrusions or gate burrs. Mold flash, protrusion and gate burrs shall not exceed 0.15mm (0.006 inch) per side.
- Dimension "E" does not include interlead flash or protrusions. Interlead flash and protrusions shall not exceed 0.25mm (0.010 inch) per side.
- 5. The chamfer on the body is optional. If it is not present, a visual index feature must be located within the crosshatched area.
- 6. "L" is the length of terminal for soldering to a substrate.
- 7. "N" is the number of terminal positions.
- 8. Terminal numbers are shown for reference only.
- Dimension "B" does not include dambar protrusion. Allowable dambar protrusion shall be 0.10mm (0.004 inch) total in excess of "B" dimension at maximum material condition.
- Controlling dimension: INCHES. Converted millimeter dimensions are not necessarily exact.
