

LINEAR INTEGRATED CIRCUITS

\$148
\$148
\$148

OPERATIONAL AMPLIFIERS

- SHORT CIRCUIT PROTECTION
 - OFFSET VOLTAGE NULL CAPABILITY
 - LARGE COMMON MODE AND DIFFERENTIAL VOLTAGE RANGE
 - NO LATCH-UP
 - SLEW-RATE = $5.5\text{V}/\mu\text{s}$ ($G_v = 10$, $C_C = 3.5\text{ pF}$)

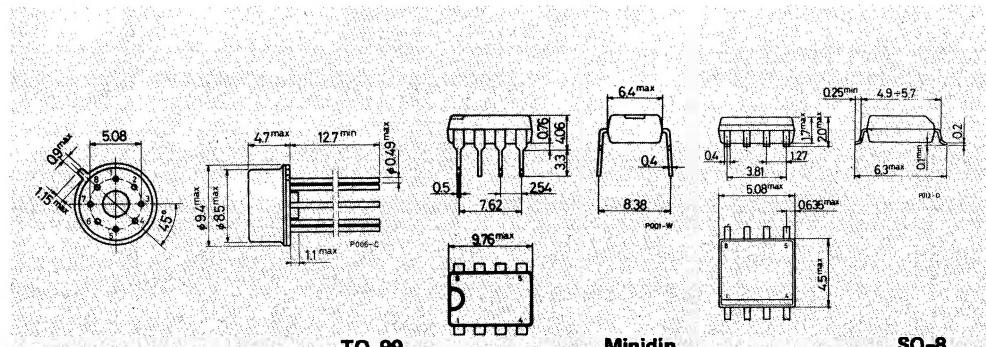

The LS 148 series consists of general purpose operational amplifiers, intended for a wide range of analog applications where tailoring of frequency characteristics is desirable. High common mode voltage range and absence of "Latch-up" tendencies make the LS 148 series ideal for use as a voltage follower. The high gain and wide range of operating voltage provide superior performance in integrators, summing amplifiers and general feedback applications. Unity gain frequency compensation is achieved by means of a single 30 pF capacitor. The LS 148 series is available with hermetic gold chip (8000 series). This is particularly suitable for professional and telecom applications, wherever very high MTBF are required.

ABSOLUTE MAXIMUM RATINGS		TO-99	Minidip	μ package
V_s	Supply voltage		$\pm 22V$	
V_i (1)	Input voltage		$\pm 15V$	
ΔV_i	Differential input voltage		$\pm 30V$	
T_{op}	Operating temperature for LS 148/LS 148A for LS 148C		-55 to 125 °C 0 to 70 °C indefinite	
P_{tot}	Output short circuit duration (2) Power dissipation at $T_{amb} = 70^\circ C$	520 mW	665 mW	400 mW
T_{stg}	Storage temperature	-65 to 150 °C	-55 to 150 °C	-55 to 150 °C

- 1) For supply voltage less than $\pm 15V$, input voltage is equal to the supply voltage.
 - 2) The short circuit duration is limited by thermal dissipation.
