description

The SN54182, SN54S182, SN74182, and SN74S182 are high-speed, look-ahead carry generators capable of anticipating a carry across four binary adders or group of adders. They are cascadable to perform full look-ahead across n-bit adders. Carry, generate-carry, and propagate-carry functions are provided as enumerated in the pin designation table above.

When used in conjunction with the '181, 'LS181, or 'S181 arithmetic logic unit (ALU), these generators provide high-speed carry look-ahead capability for any word length. Each '182 or 'S182 generates the look-ahead (anticipated carry) across a group of four ALU's and, in addition, other carry look-ahead circuits may be employed to anticipate carry across sections of four look-ahead packages up to n-bits. The method of cascading '182 or 'S182 circuits to perform multi-level look-ahead is illustrated under typical application data.

The carry functions (inputs, outputs, generate, and propagate) of the look-ahead generators are implemented in the compatible forms for direct connection to the ALU. Reinterpretations of carry functions as explained on the '181, 'LS181, and 'S181 data sheet are also applicable to and compatible with the look-ahead generator. Logic equations for the '182 and 'S182 are:

$$\begin{aligned}
 C_{n+x} &= G_0 + P_0 C_n \\
 C_{n+y} &= G_1 + P_1 G_0 + P_1 P_0 C_n \\
 C_{n+z} &= G_2 + P_2 G_1 + P_2 P_1 G_0 + P_2 P_1 P_0 C_n \\
 G &= G_3 + P_3 G_2 + P_3 P_2 G_1 + P_3 P_2 P_1 G_0 \\
 \bar{P} &= P_3 P_2 P_1 P_0
 \end{aligned}
 \quad \text{or} \quad
 \begin{aligned}
 C_{n+x} &= \overline{Y_0 (X_0 + C_n)} \\
 \bar{C}_{n+y} &= \overline{Y_1 (X_1 + Y_0 (X_0 + C_n))} \\
 \bar{C}_{n+z} &= Y_2 \{ X_2 + Y_1 [X_1 + Y_0 (X_0 + C_n)] \} \\
 Y &= Y_3 (X_3 + Y_2) (X_3 + X_2 + Y_1) (X_3 + X_2 + X_1 + Y_0) \\
 X &= X_3 + X_2 + X_1 + X_0
 \end{aligned}$$
