SN74AS131A
3-LINE TO 8-LINE DECODER/DEMULTIPLEXER
WITH ADDRESS REGISTERS

- **Combines Decoder and 3-Bit Address Register**
- **Incorporates Two Enable Inputs to Simplify Cascading**
- **Package Options Include Plastic Small-Outline (D) Packages and Standard Plastic (N) 300-mil DIPs**

description

The SN74AS131A is a 3-line to 8-line decoder/demultiplexer with registers on the three address inputs. When the clock (CLK) input goes from low to high, the device acts as a decoder/demultiplexer and the address present at the select (A, B, and C) inputs is stored in the registers. Further address changes are ignored until the next rising transition of CLK. The output-enable (G1, $\overline{G2}$) inputs control the state of the outputs independently of the select or CLK inputs. All of the outputs are high unless G1 is high and $\overline{G2}$ is low. This device is ideally suited for implementing glitch-free decoders in strobed (stored-address) applications in bus-oriented systems.

The SN74AS131A is characterized for operation from 0°C to 70°C.

[†] Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
