

SCHEMATIC DIAGRAM (

(RF UNIT)

11. DC voltage measurements are taken with voltmeter from the negative voltage source.
No Mark: Talk position
() : Standby position
< > : Intercom position

Measurements are taken
from the negative voltage line.
Talk position
by position
from position

Important Safety Notice:

The shaded area on this schematic diagram incorporates special features important for protection from fire and electrical shock hazards. When servicing it is essential that only manufacturer's specified parts be used for the critical components in the shaded areas of the schematic.

This schematic diagram may be modified at any time with the development of new technology.
